ABSTRACT

From analysis of some reality and conditions in teaching and learning in the credit training system of informatics subjects in Hue University's College of Education which the author taught online via the website www.elearning.dhsphue.edu.vn, the author has suggested elearning organizational model with support of internet and web technology for two objects: students for none Specific Purposes (NSP) learning “basic information technology subjects” and IT students for Specific Purposes (ITSP) learning “software engineering subjects”. From statistics of the results and feedbacks from the learners of the kinds of training, the author has suggested elearning organizational model appropriate with the credit training systems in Hue University's College of Education.

Keywords: E-learning, Education, Credit system, Online learning in Vietnam.
