

THE IMPORTANCE OF PEDAGOGICAL DIAGNOSTICS IN FUTURE ENGLISH TEACHER TRAINING

Bakiyeva Gulandom Xisamovna, professor, UzSWLU
Rustamova Adash Eshankulovna, PhD, associate professor, SamSIFL

ABSTRACT

The study investigates experimental research on psychological and educational diagnostic techniques of students based on their professional activities, comprehensible thinking, persistent professional conduct on the culture of thinking, and creative attitudes and communication. The essay underlines that the consistency of the outcomes of repeated analytical conclusions is required to assure the trustworthiness of educational diagnostics.

Keywords: Pedagogical diagnostics, research, testing, experience, analysis.
